*Pending satisfactory completion of all requirements.

As final action cannot be taken before the program goes to press, Thomas Jefferson University reserves the right to add or withdraw names from the list of candidates for degrees.

DOCTOR OF SCIENCE — ERNEST LEROY BOYER

Ernest LeRoy Boyer was born in 1928, in Dayton, Ohio, where he attended public schools. A graduate of Greenville College with a Bachelor of Arts degree, he went on to the University of Southern California, where he earned both a Master of Arts and a Doctor of Philosophy degree.

From 1950 to 1956, Doctor Boyer held a variety of faculty positions in speech pathology and forensics. In 1956, he became Academic Dean at Upland College in California, where he introduced an experimental mid-year term, the nation's first so-called four-one-four calendar, subsequently adopted by many other colleges.

Doctor Boyer became Director of the Commission to Improve the Education of Teachers at the Western College Association in 1960. Two years later, he went to the University of California, Santa Barbara, as Director of the Center for Coordinated Education.

In 1965, Doctor Boyer joined the State University of New York for what would become a twelve-year association. Beginning as Executive Dean, Doctor Boyer was promoted to Executive Vice Chancellor in 1968 and then Chancellor in 1970. Among his accomplishments as head of the largest university in the United States — sixty-four institutions with over 350,000 students — were his development of an experimental three-year Bachelor of Arts degree program, his establishment of a new rank for Distinguished Teaching Professor, and his negotiation of the first undergraduate exchange program with the Soviet Union.

Doctor Boyer became the twenty-third United States Commissioner of Education in 1977, administering a twelve billion dollar federal budget. While serving as Commissioner, he emphasized excellence in education and centrality of language.

In 1980, Doctor Boyer joined the Carnegie Foundation for the Advancement of Teaching as its President, a position he still holds. Doctor Boyer's most recent publication is the widely acclaimed book entitled *High School*, a report on secondary education in America.

Throughout his career, Doctor Boyer has earned numerous honors and awards, including Visiting Fellow at Cambridge University, Distinguished Fulbright Professor, and the President's Medal from Tel Aviv University. In a national survey taken in 1983, Doctor Boyer was selected by his peers as the leading educator in the nation; and for five consecutive years, he has been listed by *U.S. News and World Report* as one of the top educators in the nation. He holds honorary degrees from nearly seventy United States colleges and universities. In addition, Doctor Boyer has been named by three Presidents of the United States to National Commissions.

Presently, in addition to serving as President of the Carnegie Foundation for the Advancement of Teaching, Doctor Boyer is a Senior Fellow of the Woodrow Wilson School, Princeton University. Among his many other activities, Doctor Boyer is also a member of the Council on Foreign Relations, the National Council for American Overseas Schools for the Department of State, a Trustee of the Educational Testing Service and several colleges, including Haverford College in Pennsylvania.

Doctor Boyer, a Quaker, is married to the former Kathryn Garis Tyson, a certified nurse midwife. They have four children.

DOCTOR OF LETTERS — ROBERT EARL KINSINGER

Robert Earl Kinsinger was born in Chicago, Illinois, in 1923. He earned his Bachelor of Arts and Master of Arts degrees from Stanford University in 1948, and 1951, respectively and a Doctor of Education from Columbia University in 1958.

Doctor Kinsinger served as a chapter manager of the American Red Cross from 1949 to 1956, then taught at both Queens College and Columbia University. From 1957 to 1960, he served as educational consultant on the staff of the National League for Nursing. In 1960, he became director of health-related curriculum programs for the State University of New York, a position he held until 1966.

In 1966, Doctor Kinsinger began a seventeen-year association with the W. K. Kellogg Foundation of Battle Creek, Michigan. He served first as Program Director until 1970, then as Vice-President until 1983.

As a writer, Doctor Kinsinger is the author of *Education for Health Technicians — An Overview* (1956) and co-author of *Clinical Nursing Instruction by Television* (1965). He was also the editor of *Career Opportunities for Health Technicians* (1971).

Doctor Kinsinger's expertise has been called upon by many national organizations in the education and health fields. He has been a consultant to the U.S. Office of Education, the U.S. Public Health Service, the National Academy of Science, the Smithsonian Institution, the American Hospital Association, and the American Dietetics Association, among others.

Doctor Kinsinger's honors include the Honors of Society Award, the highest award of the American Society of Allied Health Professions; "Man of the Year" from the National Council on Community Services; the Commission of Honor of the State University of New York; the Distinguished Alumnus Award from Columbia University; and the National J. Warren Perry Allied Health Leadership Award.

Currently, Doctor Kinsinger is Chairman of Educational Services for the Professions, based in Lexington, Kentucky. In addition, he serves on advisory committees for the National Commission for Health Certifying Agencies and the Corporation for Community College Television. Doctor Kinsinger is also a member of the Board of Directors of Jossey-Bass Inc., Publishers, along with several other board and executive committee positions.

Doctor Kinsinger is married, has three children and three grandchildren, and lives in Twain Harte, California.

THE UNIVERSITY MACE

The Thomas Jefferson University Mace, carried for the first time in these 1986 Commencement Ceremonies by Grand Marshal Robert J. Mandle, Ph.D., Professor of Microbiology, was designed by Howard Serlick, member of the Guild of Mastercraftsmen, Winterthur Scholar, and Chief Conservator (Gilding) of the Historical Society of Pennsylvania. It was crafted by silversmith Eugene Zweigle and woodturner Michael Copeland.

The four-foot long, fourteen-pound Mace is made of ebony highlighted with lapis lazuli to reflect Jefferson's colors (black and blue). It features a miniature of Henry Mitchell's sculpture, The Winged Ox, symbol of Saint Luke the Physician, the original of which stands beside the Scott Building on Walnut Street. The miniature was cast in silver by Mister Zweigle, who also fabricated the University seal, the profile of Thomas Jefferson, mounted at the base of the staff. The J. E. Caldwell Company coordinated the project.

Mister Mitchell's original statue of The Winged Ox, adopted by the University in 1976 as its symbol of clinical excellence, is mounted on a column containing the names of fifty medical scientists who have most advanced the art of healing. It also reflects the historical evolution of Thomas Jefferson University from its beginnings as Jefferson Medical College in 1824 to its current status as an academic health center comprising the Medical College, the College of Allied Health Sciences, the College of Graduate Studies, and the Jefferson Hospital.

The Mace, a grand emblem of the University's heritage, will be carried at the head of all formal academic processions.

THE ACADEMIC COSTUME

The wearing of academic dress dates back to the early days of the oldest universities in the world. In the American Council on Education's book entitled "American University and Colleges" it is suggested that "gowns may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods seem to have served to cover the tonsured head . . ."

Throughout the years European universities have continued to show great diversity in their academic dress. American universities, on the other hand, when they decided to adopt academic dress in 1895, immediately established a code of regulations which today is followed by almost all American institutions. The establishment of this code has made it possible to distinguish the Associates, Bachelors, Masters, and Doctors and at the same time recognize the university which has given them the degree. Revisions to the code have occurred from time to time.

The Associate in Arts and Bachelor's gowns have pointed sleeves and are worn closed. The Master's gown has oblong sleeves, open at the wrist. The rear part of its oblong shape is square cut and the front part has an arc cut away, and is worn open or closed. The Doctor's gown has bell-shaped sleeves. It is worn opened or closed. Cotton poplin or similar material is used for the Associate's, Bachelor's and Master's degrees, and rayon or silk ribbed material is used for the Doctor's degree. The majority of gowns are black but a number of institutions have adopted other colors to identify special programs or groups within the institution.

The hoods vary in length: 48 inches for the Doctor's degree, 42 inches for the Master's, and 36 inches for the Bachelor's and Associate's. All hoods are lined in silk in the academic color or colors of the institution conferring the degree. If the institution has more than one color, the colors are shown in divisions using chevrons. The binding or edge of the Doctor's, Master's and Bachelor's hoods are usually made of velvet in the color designating the subject in which the degree was granted. The Associate of Arts hood has no velvet border. The outside is black.

Black mortarboards are most commonly worn; six-sided tams of various colors may be used.

Some of the colors in the bindings of the hoods are:

| | | | |
|----------------------|------------------|-------------------------|---------------|
| white | Arts and Letters | green | Medicine |
| tan | Business | apricot | Nursing |
| lilac | Dentistry | dark blue | Philosophy |
| light blue | Education | salmon pink | Public Health |
| purple | Law | golden yellow | Science |

The colors of the linings of the hoods for some Philadelphia academic health institutions are:

| | | | |
|--------------------------|-----------------------------|-----------------------------------|-------------------------------------|
| black and blue | Thomas Jefferson University | silver gray and scarlet | The Medical College of Pennsylvania |
| red and blue | University of Pennsylvania | | |
| blue and gold | Hahnemann University | white and cherry | Temple University |

THE JEFFERSON PROCESSIONAL

The Jefferson Processional was commissioned by the Alumni Association of Jefferson Medical College and played for the first time on November 15, 1974, at the Sesquicentennial Celebration of Jefferson Medical College of Thomas Jefferson University. This piece was presented to Thomas Jefferson University by the President of the Alumni Association of Jefferson Medical College, Doctor John J. Gartland. The composition was composed by Burle Marx.

THE PRESIDENTIAL BADGE OF THOMAS JEFFERSON UNIVERSITY

The President's Badge was created for the Inauguration of Lewis W. Bluemle, Jr., M.D., the third President of Thomas Jefferson University, on September 7, 1977. It consists of four official corporate seals of Thomas Jefferson University and the predecessor corporation, The Jefferson Medical College of Philadelphia. These seals were used to mark diplomas, certificates, and other official documents and have been gold-plated to form the Presidential Badge.

The medallion on the President's right is the corporate seal of Thomas Jefferson University today and was created in 1969 when Jefferson Medical College became Thomas Jefferson University. It carries a contemporary likeness of Thomas Jefferson.

The other three medallions are the various seals that were used in Jefferson Medical College for many years. The oldest marked every diploma that was issued by the College from 1839 to 1967. This seal carries a traditional likeness of a young Thomas Jefferson and the founding date of the College as 1826. Prior to 1839 the diploma of Jefferson Medical College carried the seal of the Jefferson College in Canonsburg, Pennsylvania — the parent institution.

Another seal was developed in 1967 as a result of research done by the late Edward L. Bauer, Professor Emeritus of Pediatrics, who determined that the founding year of Jefferson Medical College was 1824 rather than 1826. This seal is identical to the present corporate seal except the words "Thomas Jefferson University" replace "Jefferson Medical College". It was used for only two years — from 1967 to 1969.

The Presidential Badge is on permanent display in the Scott Library and is used at all convocations of the University.

1871. The first of the year was a very dry one, and the
season was generally unfavorable for the crops. The
winter was very cold, and the spring was very dry.
The summer was very hot, and the autumn was very
dry. The crops were generally poor, and the
stock was very thin. The year was a very
difficult one for the people of the country.
